

# Server opening notice

Open server number 2022-w.2

## NO.1 Overview

Before entering the minecraft server (hereinafter referred to as the server) provided by us, you must agree to the content of this notice and all attachments in this notice. We recommend that you check (Annex 3) the opening content so that you can have a better gaming experience.

When you enter the server, you are deemed to agree to the rules and the content of this notice.

Those who disagree or disagree with the rules will not be able to join the server!

## NO.2 Summary

1. Server content:Biggest\_Xuan modpack (Java 1.12.2)
2. Opening time: 2022.1.8-2022.2.15
3. Access method: IP connection
4. Game verification: official verification, whitelist
5. Tariff standard: see below

## NO.3 Tariff standards

Server operation will adopt local intranet mapping server or lease vps. The former will cause large losses to the hardware and consume huge power; the latter will require payment. Therefore, we will charge some users to balance the expenses.

Some users can play the game without paying a fee. *(Attachment 2) No need to pay a list*

Users can choose to pay in a single payment, pay monthly, pay in cycles, and only support paypal.

Among them, a single payment refers to: the payment of the archived game from the start of the service to the end of the service period;

Monthly payment means: no need to pay again within 31 days from the day of payment;

Periodic payment means: there is no need to pay again during the current live broadcast and the service opening period. (This round of cycle to 2022.2.25).

Among them, the tariff standards for this "Biggest\_Xuan modpack" are:

Everyone can get a 7-day experience period. After the experience period is over, you can choose to pay to continue playing or complete the paid task to continue playing, otherwise, you will not be able to enter the game again.

Single payment: \$2.99 /once

Monthly payment: \$2.99 /month

Periodic payment: \$3.99 /cycle

Refund instructions:

When any paying user has an objection to the server and meets the refund instructions, we will give a refund.

Because different regions have different policies, if you need a refund, please contact a member of the management team!

When a player submits a refund application, we will review its archive, and after the review is correct, a refund will be given. If it is found during the review that the user cannot be refunded or has violated regulations or notifications, the refund will be postponed. If during the deferred refund processing period, this behavior is considered a violation and will be blocked, the refund application will be returned.

N04. All

When there is any unexpected situation, please contact the administrator and deal with it as soon as possible.

If there is any loss, it will be compensated after the management team approves it.

If it is blocked by mistake, please contact the administrator as soon as possible.

The integration package has been changed by the server owner, and the content of the integration package may be changed at any time based on the opinions of players. You must agree to the regulations and the content of this notice to enter the server, and when you enter the server, you are deemed to agree to the regulations and the content

of this notice.

If other behaviors occur, the management team is willing to negotiate friendly with users and provide corresponding solutions.

According to the actual situation, this document and attachments may be changed at any time, and a notice will be issued. You need to agree to the changed content to enter the game. On the contrary, you enter the game to agree to the modified content.

The final interpretation of the content of this notice and its attachments belongs to the Biggest\_Xuan.

(Attachment 1) The Biggest\_Xuan operating server game regulation

### **The Biggest\_Xuan operating server game regulation**

This server is independently operated by **Biggest\_Xuan**, and does not have a separate server administrator. **Biggest\_Xuan**, **SDXHOP**, **MINE\_TNT**, **caigengzi**, and **TS** are members of the server management group. Except for emergencies, the members of the management group have only the console with administrator rights.

The members of the management group have the management instruction authority of /stop, /co rollback, /ban, /kick, etc. that do not affect the game content.

When you trigger any of the following regulations, members of the management team have the right to review your archives, including but not limited to backpack bar, progress (achievement) list, experience, statistical information, ender chest, /home information, etc.

Triggering the following regulations will face the risk of temporary ban:

1. Malicious intensive breeding of animals
2. Malicious high-frequency redstone
3. Malicious use of high-altitude fluids (fluids include but are not limited to water, lava, molten liquid, and star energy liquid)
4. Dense funnels/general cables/logistics pipelines and other energy or object transportation components
5. Maliciously modify the biome/summon hostile creatures
6. The rest of the players respawn and guard the corpse
7. Excavate or destroy bedrock without adding bedrock mods (except for the top floor of hell)
8. Malicious theft of other players' items
9. Kill other players maliciously
10. Malicious acts that make other players dissatisfied
11. Malicious use makes the server delay higher, including but not limited to lower tps, lower FPS of other players, etc.
12. Maliciously destroy other player's buildings
13. Malicious destruction of terrain

14. Promote other servers on the server or guide players to other servers
15. Behavior judged by the administrator to be sabotage but less serious
16. Abuse of extra permissions compared to other players
17. Build a large number of dense technology buildings in one place
18. It has not developed to the corresponding stage but there are items better than that stage (for example: endless ingots are not made but endless armor or endless tools are present)
19. Through the loopholes to brush to this stage and above items
20. Brush items more than 200,000 EMC in a single time
21. Brush items before completing two-thirds of the entire main line
22. Stick the administrator's selfie on the skin

Triggering the following regulations will face the risk of this ban/cycle ban/permanent ban:

1. Has been temporarily banned many times
2. Complained by users
3. Malicious complaints against other users
4. Use malicious software to attack server lines (including but not limited to DOCS, shellcode)
5. Use malicious methods to crash the server (including but not limited to Shulker Box + Launcher)
6. Malicious use of bugs causes server failures, or poor experience for other players
7. Malicious acquisition of rare game materials
8. Behavior judged by the administrator as malicious
9. Destroy the server command block or its related structure
10. Publish illegal advertisements and inappropriate content on the server
11. Use the FTB task book to return to the team to brush items
12. Use digital mining machines to excavate digital mining machines
13. Use the hammer core to send out the loopholes to brush the items
14. Use the most advanced void mining machine

If there are other similar violations or behaviors reported by other players, **the management team has the independent right to determine whether the behavior is malicious,** whether it violates the server regulations and give corresponding feedback. At the same time, certain penalties will be imposed on those who maliciously report other players.

(Attachment 2) Contents of the service

1. The main content of this mod is: Daxuan integration package, mainly for industry.

2. Server game settings

1. Death does not drop survival mode, difficulty: difficult

2. Seed MD5: 94B5A8F8DAD7226C2BCB04001277C83D

3. World boundary limit: 21000.0 (exceeding 500 is the Chaos Dragon Zone)

4. Genuine verification, whitelist

5. The server activates the command block at the respawn point

6. The maximum number of servers is: 6-12

Because of the heavy industrialization of archives, in order to balance the burden of the server, there are certain restrictions on the number of people.

At the same time, all chunk-loaded items cannot be used.

When a player reaches the following game stages, the server will update the maximum number of players after restarting.

Whether it is restricted, the management team will notify in real time.

7. Respawn point protection

8. The ess command can only be used with the /back command, please use a guide stone or a wormhole mirror for transmission

9. Equivalent exchange sale ratio is 5:1, and the threshold is extremely high

10. Chaos Dragon spawns every 5000 grids

11. The integration package is heavily modified, please refer to the Daxuan integration package instruction manual and JEI as the standard.

12. The FTB task of the server will be quite different from the client, and there will be virtual currency, which has no connection with real currency

13. The server will not give players any items that can be forced to load blocks

14. Don't put the Biggest\_Xuan's selfie on your skin!

15. When the following structure exists in an 8\*8 block of the server, the management team will restrict it according to the situation:

1) There are two or more AE networks with more than 32 channels or three or more AE networks

with more than 16 channels

- 2) More than 32 redstone components are in flashing state
- 3) The total number of loaded entities exceeds 300
- 4) The server reported Cant keep up many times
- 5) Decrease the overall tps of the server

server update

In order to fix bugs and better optimize the player experience, the server may be updated at variable times, during which all players will not be able to join the server. After the update, you may need to change the client package again.
